ABRAHAM IGBINIGIE'S ANSWERS TO APPLICATION QUESTIONS

1. How do you approach troubleshooting an unfamiliar technical issue?

When approaching an unfamiliar technical issue, I try to follow a structured methodology by:

- Gathering information: Collect details from the customer or logs.

- Analyzing symptoms: Identify patterns or potential causes.

- Doing Research: Consult documentation, forums, or experts.

- Isolating the issue: Use testing or troubleshooting tools to pinpoint the problem.

- Implementing a solution: Apply fixes or workarounds.

2. What tools or techniques do you use to diagnose technical problems?

Generally, this depends on the kind of technical problem and also the fact that I must thoroughly understand what the user is going through. Consequently, to diagnose technical problems, I try to use the following:

- Common Sense and experience

- System logs and event viewers

- Debugging tools like print statements or debuggers (when working with python or javascript for example)

- System monitoring tools (e.g., Task manager showing CPU, memory, or disk usage)

- Online resources, documentation, and forums and LLMs/AI as well

3. Tell us about a new technology, tool, or software you recently learned. How did you pick it up?

I already do mobile development with .NET/C# but I am currently undergoing courses in Flutter and Dart, I am utilizing online courses, YouTube videos and specialized websites dedicated to training people who need such experience

4. How do you stay updated with technical advancements in your field?
Personally, I think networking is the key. I belong to groups on WhatsApp and Slack that are totally immersed in technology and software. I also try to follow industry leaders, blogs, and news outlets and participate in social media and online in online forums and communities (especially twitter). Once in a while (weekly or monthly), I attend webinars, conferences, and meetups and I am continuously engaged in learning through online courses and tutorials as well as mentoring and being mentored.

5. Do you have customer support experience and how many years?

Yes, in a Fintech and other companies. More than 3 years.

6. Do you have Technical support experience and how many years?

Yes. More than 3 years.

7. How would you rate your English speaking accent on a scale from 0-10?

Probably 8 or 9 but I am not a poet or William Shakespeare. Thank you
